

Violin G string - first position

Selected first-position pattern. Sounding pitches. 0 = open string.
Schematic semitone spacing, not physical measurements. Other accidentals are not shown.

Try this string slowly

The chart uses one selected first-position pattern, not every accidental available in first position. Read the note names before placing a finger: high and low second fingers depend on the key.

The fourth-finger D4 on this string matches the open D string. Alternate the two slowly as an ear check; their tone colour differs even when the pitches agree.

Play the open G string (G3) for four slow beats. Let the sound settle, then name the next pitch before moving.

Play G3 - A3 - B3 - C4 - D4 and reverse the order, using one relaxed bow per note. Begin at a pace that lets you hear each change.

Repeat just A3 to B3. This gap is two semitones (a whole step). Compare the spacing with the note table rather than spreading every finger equally.
